

## The Earth

Oh how I love the Earth,  
Suspended in space,  
Filled with life

Oh how I love the Earth,  
With green fields, tumbling rivers,  
Blue skies and salty oceans.

Oh how I love the Earth,  
But in great danger we have put it,  
The ozone layer is failing  
What will protect us from the sun?

The polar ice cap is melting the waters will rise,  
What will happen to the homes by the beach?

But we can help, we just have to try  
To clean the land, water and sky.  
Recycle your paper, plastic, and glass  
Don't use fertilizer with chemicals on your grass.  
Plant trees in your yard to purify the air  
These little things show that you care.
